

PROPANE TENT HEATER

This 125K BTU Vent Free Tent Heater is a freewheeling, propane powered, quiet, vent free heater for huge reception tents and big, drafty rooms like churches or gymnasiums. It heats areas up to 2,000 sq. ft. and has an output of 125,000 BTU/hr. The sturdy top on the heater can also be used as a serving area, or preparation area. Uses 100lb tank of propane which we supply and securely install.

This unit provides quiet, gentle heat for weddings, receptions, business meetings, church gatherings, parties, and other tent events. A single unit will heat a 40' x 60' x 10' tent in only 30-40 minutes. Simply combine with additional units to provide comfortable heat for larger size tents and gatherings.
